

We are going to be using the language learning database called *Mango*, from the Connetquot Library, to learn Spanish, French, and Italian. In order for the computer to keep track of your child's progress you need to create an account.

Go to www.ccsdli.org

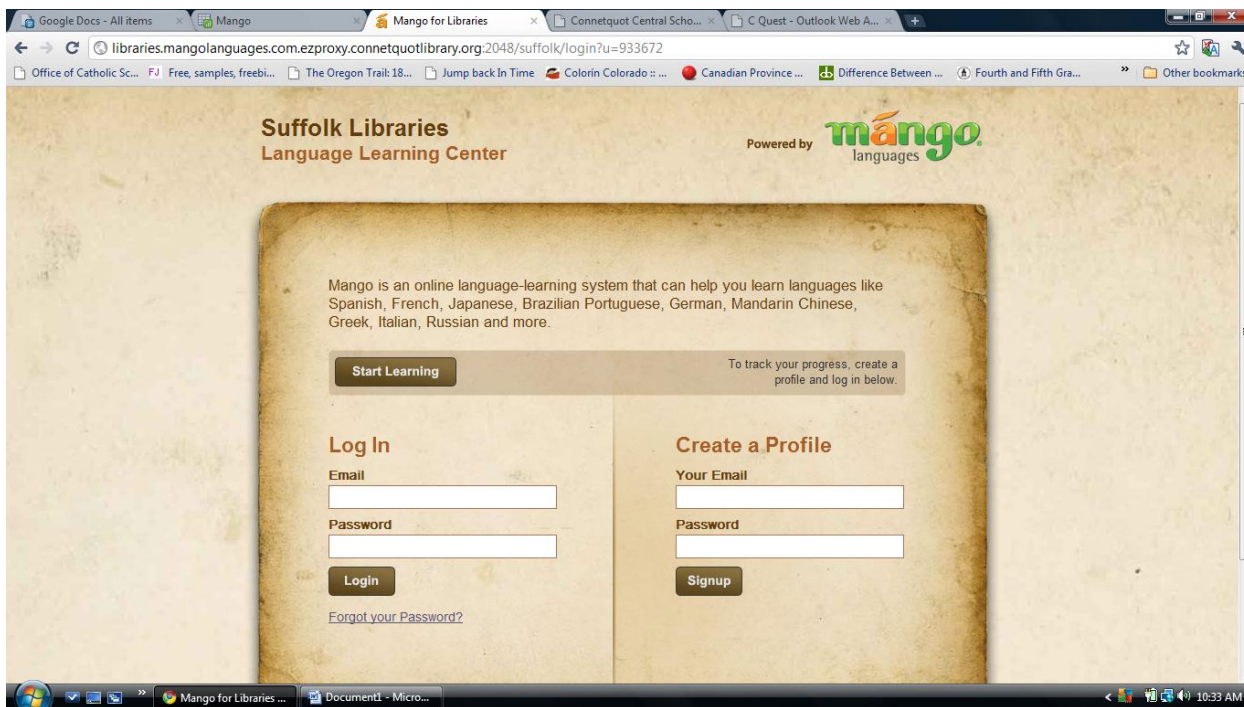

Click on *Academics* and then *C-Quest*

Scroll down and click on *C-Quest Web Links* and then click *Foreign Language*

Click on *Mango*

You will be prompted to input your library card number.

This screen will appear

Under *Create a Profile* type in your email and create a password.

Mango will then send an email to your account with a link that you have to click on to activate the account. Once the account is activated you can go to the log in side of the screen and log in. Please have your child write the email and the password in his/her agenda so it can be used in C-Quest. In middle school your child will have the choice of French, Spanish, or Italian, however you can sign up for as many languages as you choose. Try it for yourself too!

Mrs. Manza
